# IDW550

## ID Photos From the ID Printing Experts

- Quick to capture. Easy to print. Profitable to offer.
- New touchscreen console displays real-time printer status, with color coded media-level indicators.
- DNP's proprietary ID software verifies every image before printing.
- Designed for foreign and domestic passport, Visa, and specialty ID requirements

## Compact Design, Powerful Performance

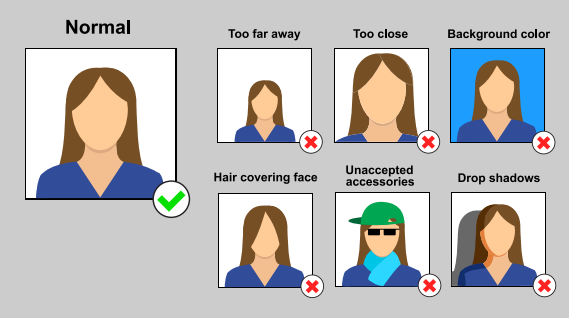

### A Powerful ID Photo Solution That Fits Anywhere

### High Demand, Big Profits

ID photo printing is a high-margin service that can help drive profitable growth. Competitive media costs and premium service pricing make it an easy way to increase profitability.

# Over 27.3 Million Passports Issued in 2025**

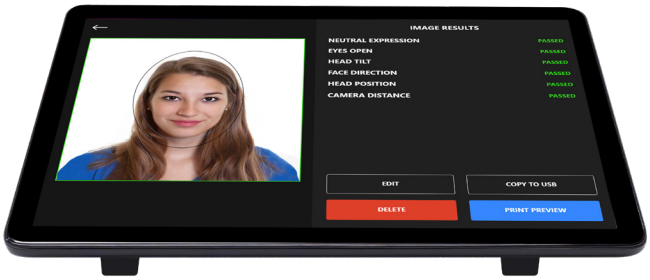

Shoot and transfer images automatically. Choose the images to process right on the IDW550 console. Fully automatic shoot-to-print settings are configurable.

### Image Verification

The IDW550 checks every image processed against 6 key image metrics, so each Passport or Visa photo meets domestic and foreign requirements, thus eliminating rejections and unhappy customers. The 6 built-in image checks automatically adjust head size, position, tilt, crop, and more to ensure the image meets chosen requirements. You can manually adjust color, brightness, contrast, and more to ensure the highest quality photo. The image file can also be exported to a USB storage.

## Easily send images using Auto-Transfer with your Wi-Fi connected camera.

The new 10" touch screen provides an enhanced overall user experience, with simple menu layout, print queue & at-a-glance printer status, to keep you informed. The new Help Screen provides direct access to product documentation as well as an AI assistant to answer most questions, and access to DNP technicians to help tackle those more difficult questions, all via a single QR code.

## Specifications

| | |
|---|---|
| **Printer** | |
| Dimensions | (WHD) 8" x 7.75" x 9.5" |
| Unit Weight w/ Console | Approx. 13lbs |
